BLENDED LEARNING: DIGITAL TEACHING IN HIGHER EDUCATION

"INCREDIBLY INSANE", "AWESOME", "INSPIRATIONAL"

These are words you don't often find associated with teaching and learning, yet they describe the experience of lecturers after completing the UKZN Extended Learning online course.

The course is based on the Activated Classroom Teaching (ACT) approach which is a taxonomy of 5 pedagogies (teaching approaches) that have been demonstrated to be effective in the digital age. The course begins with a seminar that shows delegates what teaching with technology can do and then proceeds through online lessons (MOOC) to teach delegates how to apply the approach in teaching.

Still not sure? Check out this short video
<http://bit.do/incrediblyinsane>.

Dr Craig Blewett
Programme Developer
and Facilitator

The good news is that this course is being offered by UKZN Extended Learning from **6th May to 30th June 2019**

The course begins with a seminar on 6th May (12:30 - 4pm) the remainder of the programme takes place online.

If you would like to apply to attend the course, please complete the online application form on the UKZN Extended Learning website:
www.ukznextendedlearning.com
