

Deloitte 2021 Data Factory Internships

Deloitte is inviting applications for its 2021 Risk Advisory Academy 2021 Data Factory internships from unemployed South African graduates and final year students in any of the following disciplines: **Engineering, Sciences, Computer Science or Commerce-based degree with a specialisation in IT or Computer Science/Technology.**

The Risk Advisory Academy is a performance enhancement programme where young people engage with each other and our leadership, through peer-to-peer and conversation and experiential coaching and mentoring to support the development of critical skills needed in the business environment. You will develop, amongst others: business process design, time management, conflict resolution, emotional resilience, critical thinking and business solutioning. These lifelong skills will certainly enhance future employability and mobility of a new generation of Deloitte professionals.

As a young graduate employed in the Risk Advisory Academy, you will be upskilled to serve clients with distinction so that we continue to be entrenched as the strongest and most valued brand amongst our competitors. Our professionals need to have the acumen to handle complex situations and multiple responsibilities simultaneously, balancing long-term projects with the urgency of immediate operational demands. We are committed to establishing and empowering the firm by creating an environment of continuous learning and enriching career opportunities.

These are lifelong skills will certainly enhance future employability and mobility of a new generation of Deloitte professionals.
