Supply Chain Management

CONTINUING EDUCATION

OUR WORLD IS CHANGING...SHOULDN'T YOU?

Supply Chain Management

About this programme

In a changing world the purpose of Supply Chain Management has transformed from being a function responsible for simple processes such as warehouse stock and efficient delivery, to being a composite, dynamic and fundamental process. Globalisation and technological advances mean that the Supply Chain Manager needs to be an exceptional general manager with skills in logistics, operations, manufacturing and quality assurance.

This programme provides an objective overview of Supply Chain Management from a practical business perspective. Delegates attending the programme will have the opportunity to develop practical skills for use directly on their return to the organisation.

How you will benefit

- Understand and better manage the operations of warehousing and distribution channels
- Select suppliers, purchasing systems and processes on the basis of techniques and tools used for this purpose, which optimise the decision making processes around options
- Assess the risk to supply chain processes of various internal and external factors to the business
- Understand and manage the processes for leading people in optimising the supply chain of an organisation, including internal and external customer relationship management (CRM)
- Analyse the value chain across the organisation, to assess and develop key areas critical to the success of the business
- Measure the progress and results of a change process within the supply chain of an organisation

Key focus areas

- Global competitive context
- Demand forecasting and inventory management
- Distribution and logistics management
- Strategic sourcing and supplier relationship management
- Knowledge and risk management in SCM
- Value chain and customer relationship management
- Ethics, social responsibility and sustainability

Who should attend

This programme is ideal for delegates who hold a minimum of a matric qualification; most of whom will be considering or would be involved in Supply Chain Management in the future, or will be active in this area of business and commerce

Entrance requirements

- Matric and/or relevant industry experience
- Applicant must have access to a reliable Internet line to complete required hours online

Programme fee

The programme fee of R7 380 (incl. VAT) covers online tuition, instruction material and data allocation

Disclaimer: Due to the extended planning horizon, UEL reserves the right to amend dates and prices at short notice, whilst protecting the consumer rights and interests of prospective delegates. For the most accurate information, please visit our website: www.ukznextendedlearning.com

Facilitators include:

Mr Khondlo Mtshali

Khondlo holds an MBA degree from the University of Natal and over his career has become a subject matter expert but has also developed into an expert facilitator. He is a well-researched and flexible facilitator and is well informed in SCM policies and legislative frameworks in particular across the South African public sector. His experience in facilitation lies in areas related to performance management systems, supply chain management, procurement, contract and the tendering processes. He has worked vastly with universities, government departments, municipalities and private sector. He is also a Professional Healthcare Practitioner (Pharmacist). Khondlo is a passionate researcher, coach, consultant and material developer.

Dr Hans Salisbury

Hans teaches Operations Management, Supply Chain Management and Logistics Management to third year and postgraduate students on the Pietermaritzburg campus of the University of KwaZulu-Natal. For much of his career he has worked as an agricultural consultant and project manager for a range of enterprises in Australia, Indonesia, Spain, Sudan and the USA. He brings a practical hands-on approach to the field of Supply Chain Management. He holds MBA, PGDip. Management, BSc. Agric (University of Natal) PhD (University of KwaZulu-Natal) qualifications.

Learning Methodology

Delegates attending the course are provided with a unique blended learning methodology which combines online access to subject content with real time engagement with facilitators, and the opportunity to add value through contact learning sessions, where feasible and appropriate.

Duration

3 days (interactive sessions with facilitators)

- Full implementation plan to be communicated on registration
- Recorded sessions will be available only for registered delegates for a limited period
- Assessments are restricted and all social distancing measures are adhered to as per the DOH regulations
