# Making Sense of Data: Approaches to Data Collection & Management

**12 MAY 2025, 16:00-18:00 SAST**

The *Quarterly Research Workshop Series* is an opportunity for participants to improve their biostatistics skills. This session will introduce practical and accessible strategies for collecting and managing data, focusing on research applications. Participants will learn how to design simple yet effective data collection tools in REDCap, organize and store data responsibly, and avoid common pitfalls. Whether you are working on a research project, evaluation, or quality improvement initiative, this session will help you build a strong foundation for meaningful and reliable data analysis.
