Request for Student Information – Socio-Economic Development Initiative

I hope this letter finds you well. Rand Refinery is proud to announce a socio-economic development initiative aimed at supporting engineering students and those who are studying towards STEM type qualifications who were unable to register for the next academic year due to outstanding debt from previous years. This program seeks to alleviate historic financial burdens and enable these students to resume and complete their academic journey.

As part of this initiative, we are also compiling a list of students who were unable to graduate this year due to unpaid fees. To be considered for support, students must meet the following criteria:

- A minimum academic aggregate of 65%.
- Outstanding fees that have prevented registration or graduation.

We kindly request your assistance in providing the details of eligible students at your earliest convenience. Your collaboration is vital to ensuring that these deserving individuals receive the financial support necessary to continue their education and achieve their goals.

We look forward to your response and to working together to make a meaningful impact in the lives of our future engineers.

Warm regards

UNATHI SIHLAHLA
